

FACTS ABOUT SPINA BIFIDA

Spina Bifida is the most common permanently disabling birth defect in the United States that causes mobility and functional challenges. The U.S. Public Health Service recommends that all women of child bearing age consume .4mg of folic acid per day prior to becoming pregnant and during the first trimester of pregnancy to reduce the risk of Spina Bifida.

OUR ORGANIZATION

The Spina Bifida Association of Delaware Valley (SBADV) is a 501 © (3) non-profit organization servicing the following counties: Philadelphia, Bucks, Chester, Montgomery, Delaware, Gloucester, Camden, and Burlington. The mission of The Spina Bifida Association is to build a better and brighter future for those impacted by Spina Bifida. We are volunteer-based and we provide funding for uncovered medical costs and equipment, summer camps, sports, and education needs for our constituents. Thank you for your continued support!
